John Robert McNeill (born October 6, 1954) is an American environmental historian, author, and professor at Georgetown University. He is best known for "pioneering the study of environmental history". In 2000 he published *Something New Under the Sun: An Environmental History of the Twentieth-century World*, which argues that human activity during the 20th century led to environmental damage on ...

J. R. McNeill - Wikipedia

Something New Under the Sun is the title of J. R. McNeill's environmental history of the twentieth century. It describes a high-tech era when industrial society got thoroughly sloshed on cheap energy, and went on a berserk rampage, smashing everything.
