Inorganic Chemistry 33 Chemical Process Simulation Tunghai University Chemical Process
Simulation The objective of this course is to provide the background needed by the chemical
engineers to carry out computer aided analyses of large scale Phase transformations and
phase diagrams SubstTech The typical diagram of this type is illustrated by the figure below
The diagram has two curves – liquidus equilibrium conditions of liquid phase with first solid
crystals – primary crystals and solidus equilibrium conditions of last liquid with nearly complete
solid Consider solidification of an alloy with concentration C When the alloy temperature is
higher than T L single liquid Sulfites in beer reviewing regulation analysis and role Sulfur
dioxide dissolves fairly readily in water to give a rather complicated reaction mixture strongly
dependent on concentration temperature and pH Senning 1982 Therefore the concentration of
each of the different forms is a function of the pH medium and is determined by the equilibrium
constants $K_1 = 1.6 \times 10^{-2} \text{ mol dm}^{-3}$ and $K_2 = 1.0 \times 10^{-7} \text{ mol dm}^{-3}$
