Chemical Solution Deposition Semiconductor Films - *Chemical Solution Deposition Semiconductor Films [PDF] [EPUB] [BOOKS]* Chemical vapor deposition (CVD) is a vacuum deposition method used to produce high quality, high-performance, solid materials. The process is often used in the semiconductor industry to produce thin films.. In typical CVD, the wafer (substrate) is exposed to one or more volatile precursors, which react and/or decompose on the substrate surface to produce the desired deposit. , Sun, 19 May 2019 11:42:00 GMT
