### 1 Introduction

Over the last few decades ubiquitous contamination with various inorganic and organic substances has caused serious problems all over the world One reason is the misuse or overuse of antibiotics e g for agricultural purposes which enrich the population of multi resistant pathogens In many countries with a low human development index HDI particularly in Africa and The role of antioxidants in the chemistry of oxidative This Review Article is focused on the action of the reactive oxygenated species in inducing oxidative injury of the lipid membrane components as well as on the ability of antioxidants of different structures and sources and following different mechanisms of action in fighting against oxidative stress

### Wikipedia

Microwave chemistry is the science of applying microwave radiation to chemical reactions Microwaves act as high frequency electric fields and will generally heat any material containing mobile electric charges such as polar molecules in a solvent or conducting ions in a solid Polar solvents are heated as their component molecules are forced to rotate with the field and lose energy in collisions
