Flipped classroom Wikipedia. A flipped classroom is an instructional strategy and a type of blended learning that reverses the traditional learning environment by delivering instructional content, often online, outside of the classroom. It moves activities including those that may have traditionally been considered homework into the classroom. In a flipped classroom, students watch online lectures, collaborate in online Chapter 2: How Teachers Teach Specific Methods. Science. Despite the limitations of traditional lectures, many institutions are forced to offer high-enrollment introductory science courses. Many professors who teach these courses feel that lecturing is their only option and can only dream of what they could accomplish in smaller classes.

Candy Chromatography What Makes Those Colors? R_f values are calculated by looking at the distance each component travels on the chromatography paper compared to the distance traveled by the solvent front. This ratio will be different for each component due to its unique chemical properties. When measuring the distance the component traveled, you should measure from the origin (where the middle of the spot originally was) and then to the center of the spot.
