Computational Chemistry and Molecular Modeling Preface Computational chemistry and molecular modeling is a fast emerging area which is used for the modeling and simulation of small chemical and biological systems in Supramolecular chemistry Wikipedia Supramolecular chemistry is the domain of chemistry concerning chemical systems composed of a discrete number of molecules The strength of the forces responsible for spatial organization of the system range from weak intermolecular forces electrostatic charge or hydrogen bonding to strong covalent bonding provided that the electronic coupling strength remains small relative to the energy Introduction to Inorganic Chemistry Wikibooks open Inorganic chemistry is the study of the synthesis reactions structures and properties of compounds of the elements This subject is usually taught after students are introduced to organic chemistry which concerns the synthesis and reactions of compounds of carbon typically containing C H bonds Chemistry tutorials The analytical chemistry springboard Very nicely organized and annotated by Knut Irgum Analytical instruments and spectroscopic concepts this site nicely organized by Tom Chasteen of Sam Houston State U contains tutorial materials on various topics in the form of Web pages PDF files and Quicktime movies Analytical resources from Sheffield Hallam University UK has a number of Introductory Statistics Concepts Models and An introductory statistics text for the social sciences INTRODUCTORY STATISTICS CONCEPTS MODELS
